Dear Sirs:

Enclosed for filing in the above-referenced case is a copy of the English translation of the Preliminary Examination Report, which is needed to complete the filing requirements of the above-identified new U.S. patent application.

No fees are considered to be due; however, if it is determined that payment of a fee is required, please charge our deposit account No. 13-0235.

Respectfully submitted,

Nicholas J. Tuccillo

Attorney for Applicants Registration No. 44,322

Claims

2. Citations and explanations

Industrial applicability (IA)

#### 1. Claims 1 and 2

- 1.1 The application concerns a sensor assembly having a plurality of variable resistance sensors wired in a matrix. The devices according to independent Claims 1 and 2 are characterised in that sensor elements are also wired between the row conductors (Claim 1) or the column conductors (Claim 2), in addition to the sensor elements wired between the row and column conductors.
- 1.2 In relation to the closest prior art (DE-A-196 25 730 (D1)), which discloses a contact sensor matrix used as a sensor in motor vehicles, the present application solves the problem which consists in increasing the number of sensors without increasing the number of connection lines.
- 1.3 None of the search report citations shows or suggests a sensor matrix having a number of sensors increased in this way. In particular, the number of sensors can be increased in US-A-4 673 933 (D2) by wiring additional sensors between row and column conductors. This does not suggest to a person

#### INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/EP 00/08756

skilled in the art to wire additional sensors only between row conductors or only between column conductors in D1.

The subject matter of independent Claims 1 and 2 therefore complies with the requirements for novelty and inventive step (PCT Article 33(2) and (3)).

#### 3. Claims 3-8

Claims 3-8 are dependent on Claims 1 or 2 and therefore likewise meet the PCT requirements for novelty and inventive step.

VII.	Certain	defects	in the	international	application
------	---------	---------	--------	---------------	-------------

The following defects in the form or contents of the international application have been noted:

Contrary to PCT Rule 5.1(a)(ii), the description does not cite documents D1 and D2 or indicate the relevant prior art disclosed therein.
